WORK EXPERIENCE

[SILVERLINE PUBLISHING LTD] **Spine Network App**
May 2023 – Aug 2024
https://spine.app
I worked as a backend and frontend developer.
As Backend and Frontend of Spine Network App, I lead the development and innovation of a cutting-edge platform designed to streamline and enhance professional networking, enabling users to build meaningful connections and advance their careers through a user-friendly, technology-driven interface.

WHAT I DID:
- database design
- Restful api integration
- frontend & backend developer
- git manager
- create model from api
- server management (AWS EC2, S3, Lambda, Google Clouding Service)
- test

[Select.inc] Select Accounting App
May 2023–Aug 2024
https://accounting.select-company.com
I worked as a backend developer.
As Backend Developer of Select.inc Accounting App, I oversee the creation and development of a powerful, user-friendly platform that simplifies financial management for businesses of all sizes, offering

seamless accounting solutions and real-time insights to drive informed decision-making.

WHAT I DID:
- database design
- develop backend and admin site
- git manager
- server management (Cpanel, SSH)

[Hive Mind] LOIC Cannon App
Feb 2024–July 2024
https://cannon.app
I worked as a smart contract developer.
As smart contract developer of Cannon App, I lead the development of a secure and innovative platform that leverages blockchain technology to provide decentralized solutions, empowering users with transparent, efficient, and tamper-proof applications in the digital economy.

WHAT I DID:
- smart contract developer
- frontend developer
- git manager

[Hulk Cars] Hulk Cars App
Apr 2021–Feb 2022
https://hulk-cars.vercel.app/
I worked as web designer and frontend developer.
As web developer of Hulk Cars App, I drive the vision behind our innovative platform that revolutionizes the car rental and sharing industry, offering users a seamless, convenient, and reliable way to access vehicles on demand, with a focus on customer satisfaction and cutting-edge technology

WHAT I DID:
- figma designer
- frontend developer

[Lsports] Lsports odds data provider
Oct 2019– Feb 2021
https://client.lsports.eu
I worked as database designer and api developer.
As api developer of LSports, a leading odds data provider, I oversee the delivery of real-time sports data and odds, empowering bookmakers, media outlets, and sports organizations with accurate and comprehensive information to enhance their offerings and drive informed decision-making in the sports betting industry.

WHAT I DID:
- odds data modeling
- rabbit message queue manager
- git manager
- aws server management
